Understanding Zomato Customer Ratings: An Exploratory Data Analysis Perspective

Index

1.Data Pre Processing

- 1.1 Import the data
- 1.2 Shape of the data frame
- 1.3 Identify the columns
- 1.4 Remove the unnecessary columns
- 1.5 Over view of Data Frame
- 1.6 Drop Duplicate Values

2.Data Cleaning

- 2.1 Rate Column
  - 2.1.1 Identify Unique Values
  - 2.1.2 Handling Rate Column
  - 2.1.3 Checking Null Values
  - 2.1.4 Filling Null Values
- 2.2 Location Column
  - 2.2.1 Identify Unique Values
- 2.3 Listed_in(city) Column
  - 2.3.1 Identify Unique Values
  - 2.3.2 Drop Listed_in(city) column
- 2.4 Rename the columns name
- 2.5 Cost2plate Column

2.5.1 Handling Cost2plate Column

2.5.2 Overview of Data Frame

2.6 ‘rest_type’ Column

2.6.1 Identify Unique Values

2.6.2 Check the value counts

2.6.3 Aggregate the data by count values

2.6.4 Handling ‘rest_type’ Column

2.6.5 ‘rest_type’ Column Overview

2.7 Location Column

2.7.1 Check the value counts

2.7.2 Handling Location Column

2.7.3 Overview of Data Frame

2.8 Type Column

2.8.1 Identify Unique Values

2.8.2 Type Column Overview

3.Data Visualization

3.1 Univariant Analysis

3.1.1 Count Plot based on Various Location

3.1.2 Top 5 Locations with Highest Occurrences (Excluding "Others")

3.1.3 Visualizing Online Order Availability

3.1.4 Table Booking Availability based on 'book_table' Column

3.1.5 Conclusion

3.2 Bivariant Analysis

3.2.1 Visualizing Online Order Vs Rating

3.2.2 Visualizing Book Table vs Rating

3.2.3 Visualizing Online Order Facility, Location wise

- create a data frame[df1] from existing data frame [df]
- Aggregate data using Pivot Table

3.2.4 Visualizing Booking table facility, Location wise

- create a data frame [df2] from existing data frame [df]
- Aggregate data using Pivot Table

3.2.5 Conclusion

3.3 Multivariant Analysis

3.3.1 Visualizing Restaurant Types vs Rating (Colored by Online Order Availability)

3.3.2 Count of different type restaurants by location wise

3.3.3 Conclusion

4.Satistical Analysis

4.1 Rating Visual across the Location

4.2 Normal Distribution

4.3 Hypothesis Testing

4.4 Heat Map Correlation

4.5 Conclusion
